Port Maria, Jamaica

A world away from the bustling city. With its colorful landscape, friendly people, and a tropical island vibe, Port Maria is the perfect retreat to rejuvenate and capture your imagination. Experience a unique culture, new foods, and incredible sights. Port Maria boasts a rich history, including the home of Ian Fleming, the author of James Bond novels, and it is a tropical island retreat sure to captivate your imagination.

This course is designed for physicians, physician assistants, nurse practitioners, registered nurses, and all other medical and professional care personnel who must maintain their knowledge of the specialty or service provided.

**PROGRAM PURPOSE:**
The practitioner of emergency medicine must possess evidence-based scientific background for complex clinical practice; maintain state-of-the-art shelf knowledge and all related disciplines; maintain an up-to-date armamentarium of knowledge and skills for the selection and use of the latest knowledge of the specialty and all additional related disciplines; maintain an up-to-date armamentarium of knowledge and skills for the selection and use of clinical, basic, and advanced emergency care equipment, pharmacological agents, and procedures; manage self and colleagues to meet common goals in providing care in all settings where emergency care is provided; serve as an expert in matters involving quality, safe health care delivery and support of other service providers, departments, institutions, and organization dependent upon professional expertise. Presentations must be designed to facilitate the acquisition of cognitive and technical skills as defined by the ACEP, the AOA, the American Osteopathic Board of Emergency Medicine, and governmental and professional organizations including the American College of Emergency Physicians, the American College of Surgeons and the Emergency Nurses Association, and authorize or disallow in one or more of the disciplines vital to the practicing professional.

**OBJECTIVES:**
At the completion of the activity, the participant will be able to:
- Incorporate the published standards, recommendations, recognized external organizations, and guidelines into the practice of their discipline.
- Identify and describe common adverse drug events and particular medications that are at risk for causing adverse drug reactions.
- Discuss appropriate patient care regardless of the clinical environment in which the practice resides.
- Incorporate the published guidelines in a professional, recognized external organizations, and guidelines into the practice of their discipline.
- Identify and describe common adverse drug events and particular medications that are at risk for causing adverse drug reactions.
- Discuss appropriate patient care regardless of the clinical environment in which the practice resides.
- Incorporate the published guidelines in a professional, recognized external organizations, and guidelines into the practice of their discipline.
